

MONTAGEANLEITUNG SPRITZSCHUTZ

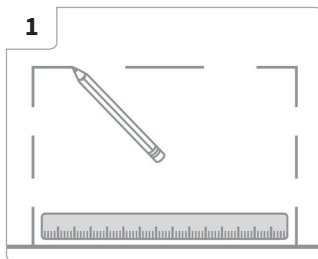

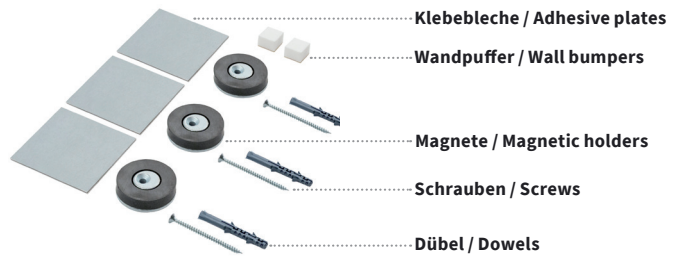

PRODUCT DETAILS FOR SPLASHBACK

de Hinweise vor der Montage

- Bei gefliesten Wänden ist es ratsam, die Bohrungen für die Magnete in den Fugen vorzunehmen. Beachten Sie jedoch die Mindestabstände aus der Montageanleitung.
- **Kleben Sie die Klebebleche unter keinen Umständen vor dem Ausmessen** der Magnethalterungen auf den Spritzschutz (Durch die extreme Haftwirkung der Bleche ist eine nachträgliche Korrektur nicht möglich!).
- Es ist empfehlenswert, den Spritzschutz auf Ihrer Küchenarbeitsplatte zu legen, um ihn bündig zur Wand zu positionieren.

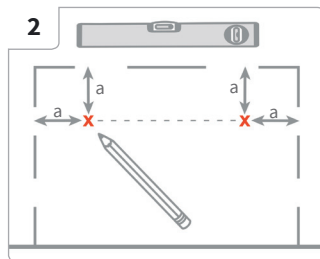

en Before the installation

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen worktop.

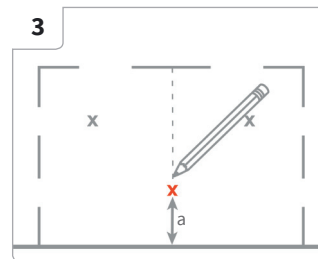

de Vermessen Sie die perfekte Position für ihren Spritzschutz und markieren Sie diese mit einem Bleistift. Alternativ können Sie auch das Bild anhalten und die Markierungen vornehmen.

en Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

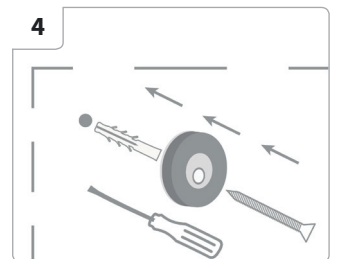

Markieren Sie die oberen Bohrungen für die Magnete innerhalb der in Schritt 1 markierten Fläche. Die Randabstände (a) zu den Bohrungen können selbst gewählt werden und sollten mind. 7cm betragen.

Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

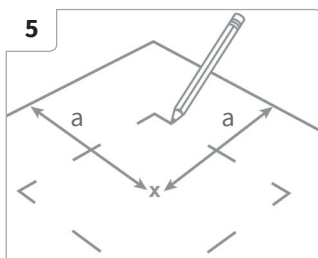

Markieren Sie die untere Bohrung zentriert zur markierten Fläche unter Berücksichtigung ihres Randabstandes (a) von mind. 7cm.

Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

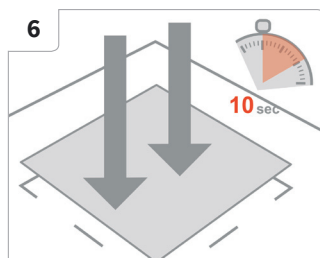

Bohren Sie die Löcher und befestigen Sie die Magnete. Legen Sie anschließend die Glasplatte mit der Rückseite nach oben auf eine ebene Fläche (z.B. Tisch) und reinigen Sie das Bild gründlich.

Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

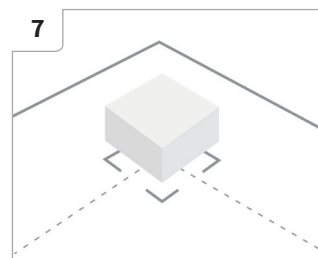

de Markieren Sie die Positionen der Klebebleche auf dem Spritzschutz mit einem Bleistift unter Zuhilfenahme eines rechtwinkligen Dreiecks. Prüfen Sie vor dem Verkleben die korrekte Position doppelt, da die Klebebleche ultra-stark haften und nur schwer wieder zu entfernen sind.

en Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

Kleben Sie das Blech auf und pressen Sie es mit beiden Händen 10 Sekunden stark an. Warten Sie anschließend 30 Minuten, damit sich die volle Klebewirkung entfalten kann.

Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

Befestigen Sie die Wandpuffer unten links und rechts mit ausreichend Abstand zum Rand.

Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

Hängen Sie das Bild auf, indem Sie es von unten nach oben vorsichtig an die Magnete anbringen und mit etwas seitlicher Krafteinwirkung korrekt auf den Magneten verschieben.

Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

DETTAGLI DEL PRODOTTO PER PARASCHIZZI

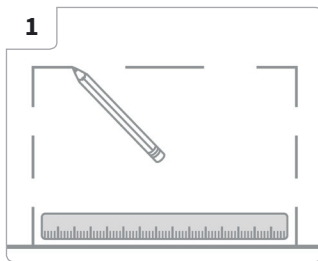

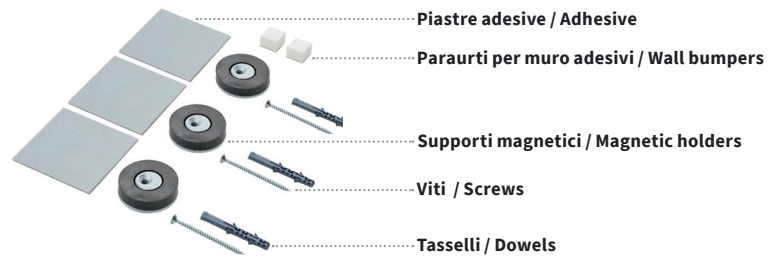

PRODUCT DETAILS FOR SPLASHBACK

it Note prima dell'installazione

- Per pareti piastrellate si consiglia di forare nelle giunture di piastrelle per il montaggio dei supporti magnetici. Si prega di fare attenzione alle distanze minime indicate
- **Non incollare le piastre adesive senza aver prima misurato e selezionato la posizione dei supporti magnetici** (a causa dell'estrema adesione non sarà possibile una correzione successiva!).
- Si consiglia di installare il paraschizzi sul muro corrispettivo al piano cottura/ di lavoro.

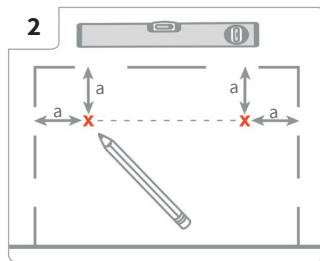

en Before the installation

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen work-top.

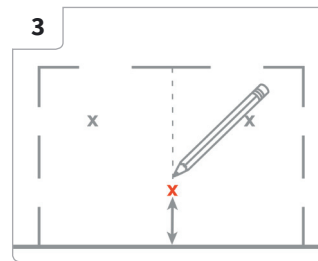

1 Misurare accuratamente la posizione del paraschizzi e contrassegnarla con una matita. In alternativa appoggiarlo alla parete e marcare la posizione.

en Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

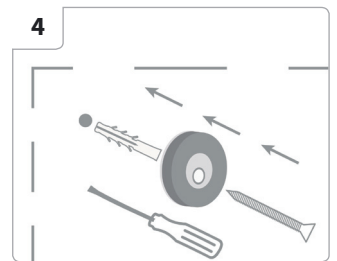

2 Segnare la posizione dei fori superiori per i supporti magnetici all'interno dell'area contrassegnata nel passaggio 1. È possibile scegliere la distanza dai bordi (a) che deve essere di almeno 7cm.

en Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

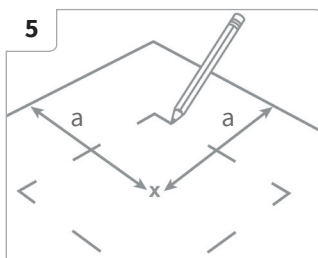

3 Segnare la posizione del foro inferiore centrato sulla superficie contrassegnata tenendo conto della distanza dal bordo (a) di almeno 7cm.

en Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

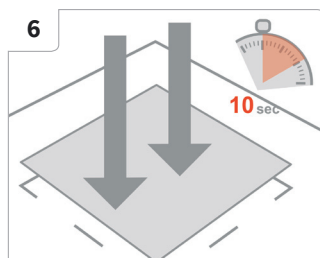

4 Trapanare i fori e fissare i magneti. Successivamente posizionare il paraschizzi con il lato posteriore rivolto verso l'alto su uno spazio piano (ad esempio sul tavolo) e pulire a fondo la superficie.

en Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

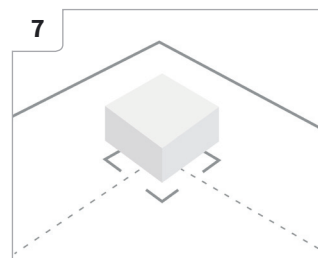

5 Segnare la posizione delle piastre adesive con l'aiuto di un triangolo ad angolo retto. Si prega di controllare che la posizione sia corretta in quanto la colla dell'adesivo è molto resistente e difficile da rimuovere.

en Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

6 Incollare le piastre adesive e premere con forza per 10 secondi con entrambe le mani. Una volta terminato attendere 30 minuti per assicurare la completa adesione.

en Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

7 Incollare il paraurti adesivo sulla superficie: uno in basso a sinistra e l'altro a destra mantenendo una distanza sufficiente dai bordi.

en Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

8 Appendere il paraschizzi facendolo scivolare leggermente dalla parte inferiore alla parte superiore dei magneti e farlo scorrere sugli stessi con una leggera spinta laterale.

en Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

INSTRUCCIONES DE INSTALACIÓN DEL PROTECTOR CONTRA SALPICADURAS

PRODUCT DETAILS FOR SPLASHBACK

es Avisos antes del montaje

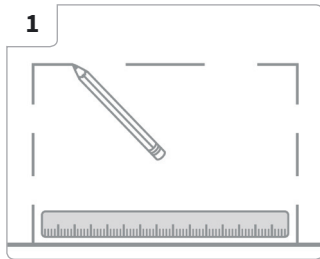

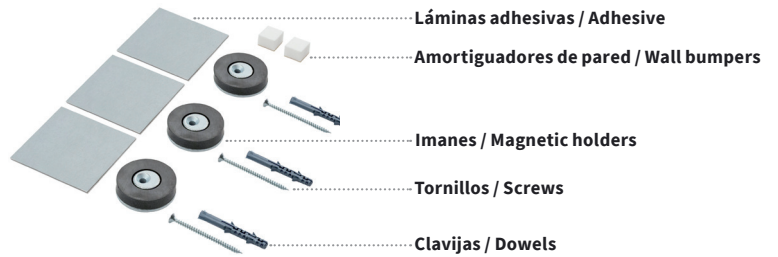

- En el caso de las paredes alicatadas, es aconsejable perforar los agujeros para los imanes en las juntas. No obstante, respete las distancias mínimas de las instrucciones de montaje.
- **No pegue en ningún caso las láminas adhesivas en el protector contra salpicaduras antes de medir los soportes magnéticos** (¡debido al efecto adhesivo extremo de las láminas, no es posible la corrección posterior!).
- Se recomienda colocar el protector contra salpicaduras en la encimera de la cocina para colocarlo a ras de la pared.

en Before the installation

In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.

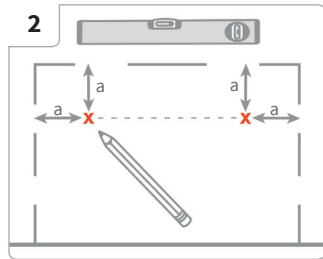

Do not stick the adhesive plates without first measuring and carefully selecting the position of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).

It is recommended to install the splashback on the wall at the kitchen work-top.

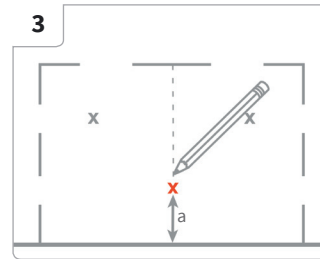

es Mida la posición perfecta para el protector contra salpicaduras y márkuela con un lápiz. Alternativamente también puede sostener el cuadro y realizar las marcas.

en Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

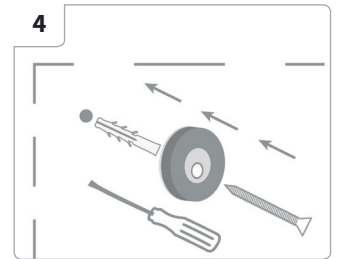

Marque los agujeros superiores para los imanes dentro del área marcada en el paso 1. Las distancias de los bordes (a) a los agujeros puede elegirlos usted mismo y deben ser de al menos 7 cm.

Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

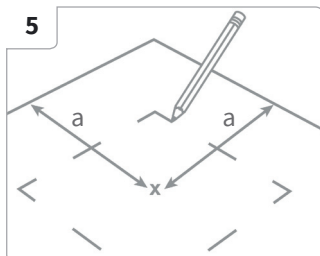

Marque el agujero inferior centrado en la superficie marcada, teniendo en cuenta la distancia del borde (a) de al menos 7 cm.

Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

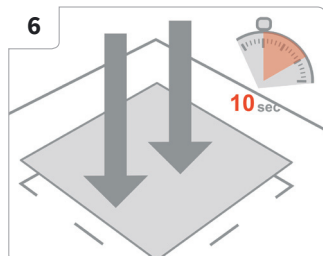

Perfore los agujeros y coloque los imanes. A continuación, coloque la placa de vidrio con el reverso hacia arriba sobre una superficie plana (por ejemplo, una mesa) y limpie bien el cuadro.

Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

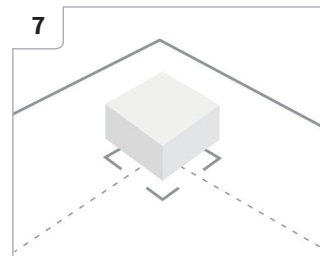

es Marque las posiciones de las hojas adhesivas en la protección contra salpicaduras con un lápiz con una escuadra rectangular. Compruebe dos veces la posición correcta antes de pegarlas, ya que las hojas adhesivas se adhieren con mucha fuerza y son difíciles de quitar.

en Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

Pegue la hoja y presione fuertemente con ambas manos durante 10 segundos. A continuación, espere 30 minutos para que haga efecto todo el adhesivo.

Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

Fije los amortiguadores de pared en la parte inferior izquierda y derecha con una distancia suficiente desde el borde.

Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

Cuelgue el cuadro fijándolo cuidadosamente a los imanes de abajo hacia arriba y deslizándolo correctamente sobre los imanes con un poco de fuerza lateral.

Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

INSTRUCTIONS DE MONTAGE FOND DE HOTTE

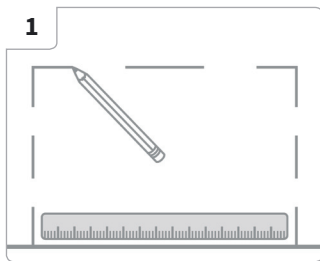

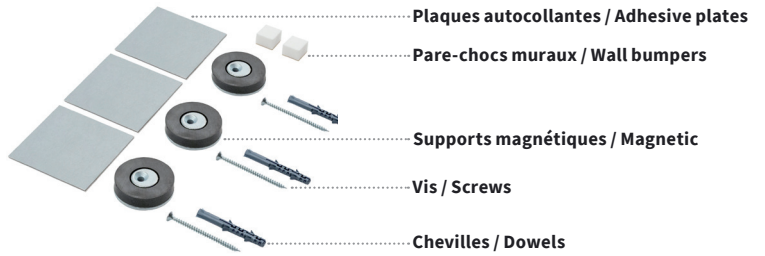

PRODUCT DETAILS FOR SPLASHBACK

(fr) Indications avant le montage

- Pour des murs carrelés, il est recommandé de percer des trous dans les joints des carreaux pour le montage des supports magnétiques. Veuillez respecter les distances minimales indiquées.
- Ne fixez pas les plaques autocollantes sans avoir préalablement mesuré et sélectionné la position des supports magnétiques (en raison de l'extrême adhérence, une correction ultérieure n'est pas possible!).
- Il est recommandé de placer le fond de hotte sur la plaque de cuisson pour le positionner contre le mur.

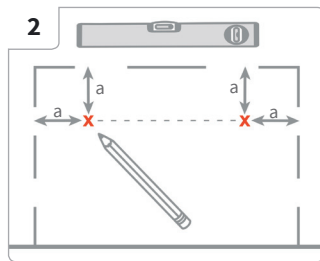

(en) Before the installation

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen work-top.

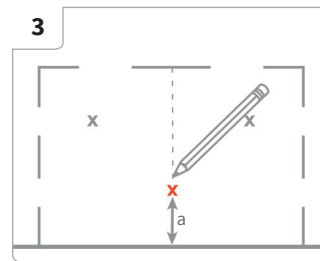

(fr) Mesurez soigneusement la position parfait du fond de hotte et marquez-la avec un crayon. Vous pouvez également le placer sur le mur et marquer la position.

(en) Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

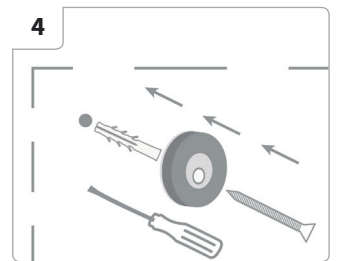

(fr) Marquez la position des trous supérieurs pour les supports magnétiques dans la zone marquée à l'étape 1. La distance entre le trou et le bord supérieur et latéral doit être la même. Vous pouvez choisir la distance des bords (a) qui doit être d'au moins 7 cm.

(en) Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

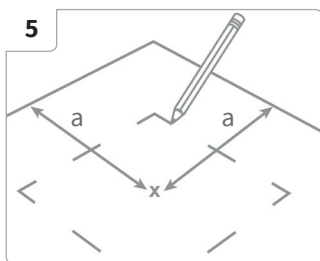

(fr) Marquez la position du trou inférieur centré sur la surface marquée. N'oubliez pas que la distance des bords doit être d'au moins 7 cm (a).

(en) Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

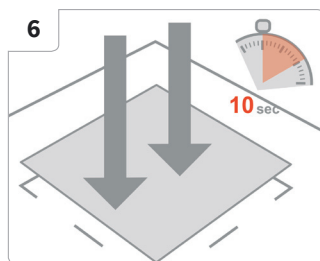

(fr) Percez les trous et fixez les supports magnétiques. Placez ensuite la plaque de verre sur une surface plane (par exemple une table) avec le dos tourné vers le haut et nettoyez la surface soigneusement.

(en) Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

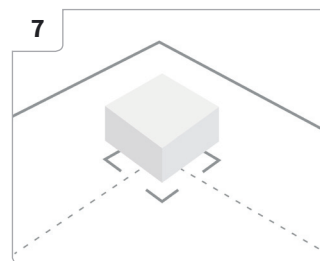

(fr) Marquez la position des plaques autocollantes sur le fond de hotte avec un crayon et avec un triangle à angle droit. Vérifiez la bonne position avant de coller, car les plaques autocollantes sont ultra adhésives et difficiles à retirer.

(en) Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

(fr) Collez la plaque et appuyez fortement avec les deux mains pendant 10 secondes. Attendez ensuite 30 minutes pour que l'effet adhésif complet puisse se développer.

(en) Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

(fr) Fixez les pare-chocs muraux en bas à gauche et à droite avec une distance suffisante du bord.

(en) Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

(fr) Accrochez le fond de hotte en l'attachant soigneusement aux supports magnétiques de bas en haut et en le déplaçant correctement sur les supports magnétiques avec un peu de poussée latérale.

(en) Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

INSTRUKCJA MONTAŻU PANELU

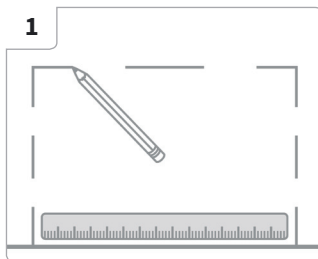

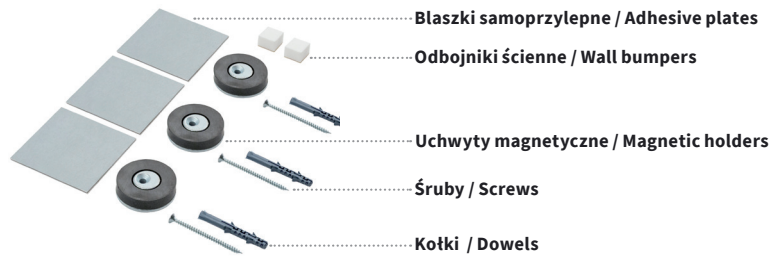

PRODUCT DETAILS FOR SPLASHBACK

pl Instrukcje przed montażem

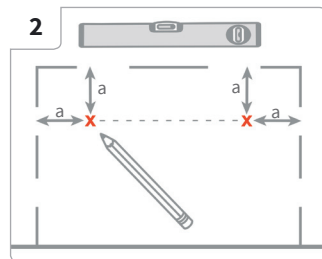

- W przypadku ścian wyłożonych płytkami zaleca się wiercenie otworów w fugie do zainstalowania uchwytów magnetycznych. Zwróć uwagę na minimalne odległości wskazane w instrukcji.
- Nie przyklejaj płyt samoprzylepnych bez uprzedniego pomiaru i wyboru położenia uchwytów magnetycznych (ze względu na ekstremalną przyczepność płyt, późniejsza korekta nie jest możliwa).
- Zaleca się montaż panelu na ścianie przy blacie kuchennym.

en Before the installation

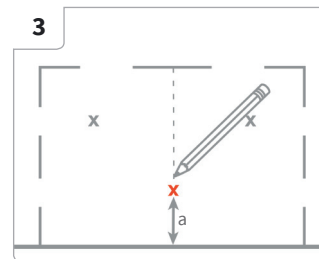

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen work-top.

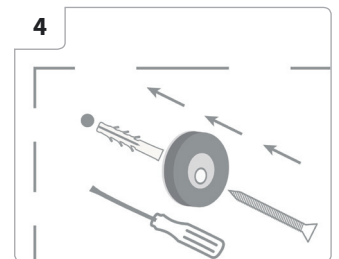

- 1 Zmierz odpowiednią pozycję dla swojego panelu i zaznacz ją ołówkiem. Możesz go również umieścić na ścianie i zaznaczyć jego położenie.

- 2 Zaznacz położenie górnych otworów na uchwyty magnetyczne w obszarze zaznaczonym w kroku 1. Odległość od otworu do górnej krawędzi i boku musi być taka sama. Odległość (a) musi wynosić co najmniej 7 cm.

- 3 Zaznacz dolny otwór na środku zaznaczonego obszaru. Nie zapominaj, że odległość od krawędzi musi wynosić co najmniej 7 cm (a).

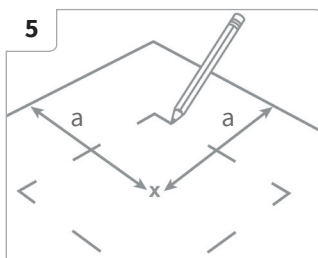

- 4 Wywierć otwory i przymocuj uchwyty magnetyczne. Następnie umieść panel na płaskiej powierzchni (np. stół) tyłem do góry i dokładnie oczyść powierzchnię.

- en Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

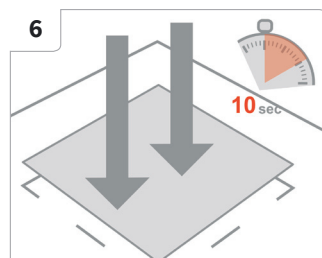

- en Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

- en Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

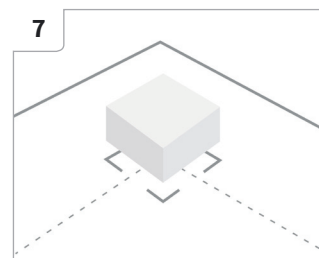

- en Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

- pl Zaznacz położenie blaszek samoprzylepnych na spodzie panelu ołówkiem pod kątem prostym. Przed położeniem upewnij się dwa razy, czy ułożenie jest prawidłowe, ponieważ płyty samoprzylepne są bardzo przyczepne i trudne do usunięcia.

- pl Przyklej blaszki samoprzylepne i mocno dociśnij obiema rękami przez 10 sekund. Następnie odczekaj 30 minut, aby pełna skuteczność klejenia mogła się rozwinąć.

- pl Przyklej odbojniki ścienne: jeden na dole po lewej i prawej stronie, zachowując wystarczającą odległość od krawędzi.

- pl Zawieś panel, delikatnie przechylając go od dołu do góry magnesów i wsuwając go z lekkim pchnięciem dokładnie w miejsce magnesów.

- en Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

- en Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

- en Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

- en Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

MONTAGEHANDLEIDING SPATSCHEM

PRODUCT DETAILS FOR SPLASHBACK

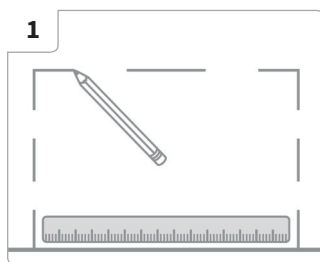

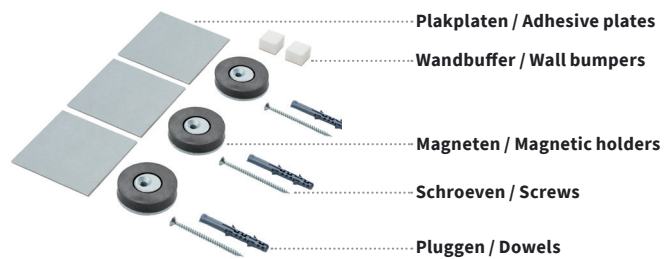

KEUKEN

(nl) Belangrijke informatie voor de montage

- Bij betegelde wanden is het raadzaam om de boorgaten voor de magneten in de voegen aan te brengen. Let echter op de minimale afstanden in de montagehandleiding.
- **Plak het kleefoppervlak nooit voor het uitmeten van de magneethouders op de spatbescherming** (door de extreme hechtende werking van de platen is correctie achteraf niet mogelijk!).
- Aanbevolen wordt om de spatbescherming op uw keukenblad te leggen, om deze vlak met de wand te positioneren.

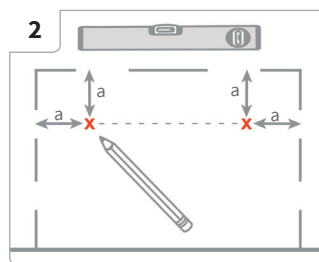

(en) Before the installation

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen work-top.

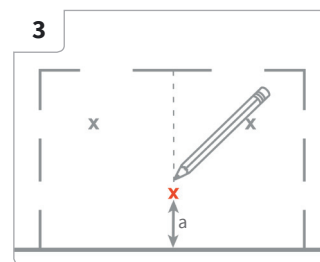

(nl) Meet de perfecte positie voor uw spatbescherming uit en markeer deze met een potlood. Als alternatief kunt u de afbeelding vasthouden en de markeringen aanbrengen.

(en) Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

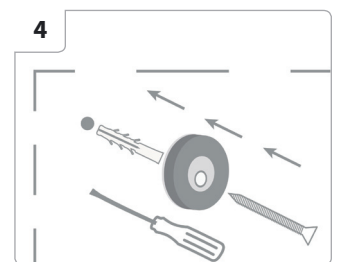

Markeer de bovenste boorgaten voor de magneten binnen het in stap 1 gemarkeerde oppervlak. De randafstanden (a) ten opzichte van de boorgaten kunnen zelf gekozen worden en moeten min. 7 cm bedragen.

Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

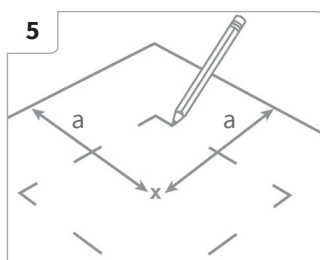

Markeer het onderste boorgat gecentreerd ten opzichte van het gemarkeerde vlak met inachtneming van de randafstand (a) van min. 7 cm.

Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

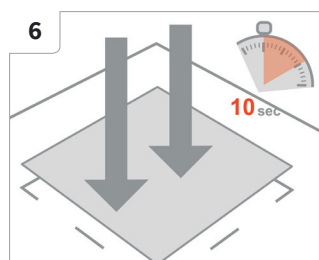

Boor de gaten en bevestig de magneten. Plaats vervolgens de glasplaat met de achterkant naar boven op een effen vlak (bijv. tafel) en reinig de afbeelding grondig.

Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

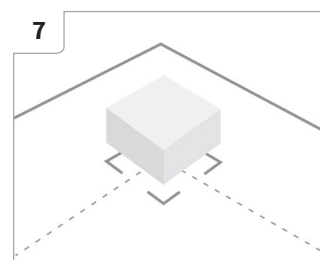

(nl) Markeer de posities van de kleefplaten op de spatbescherming met een rechthoekige driehoek. Controleer voor het plakken de correcte positie twee keer, omdat de kleefplaten ultrasterk hechten en maar moeilijk weer verwijderd kunnen worden.

(en) Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

Plak de plaat en druk deze met beide handen 10 seconden stevig aan. Wacht vervolgens 30 minuten, zodat de volledige kleefwerking zich kan ontploien.

Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

Bevestig de wandbuffers links- en rechtsonder met voldoende afstand ten opzichte van de rand.

Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

Hang de afbeelding op, waarbij u deze van onder naar boven voorzichtig op de magneten aanbrengt en met een beetje zijdelingse krachthinwerking correct op de magneten schuift.

Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.

NÁVOD K INSTALACI KRYTU PROTI STRÍKAJÍCÍ VODĚ

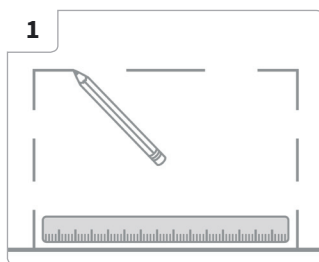

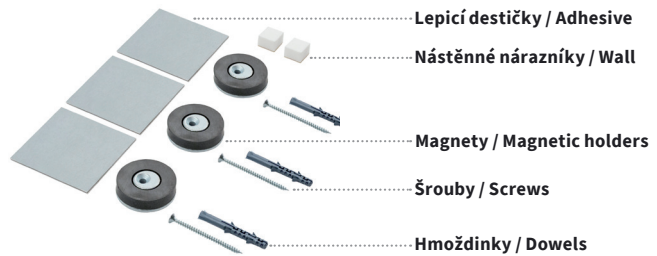

PRODUCT DETAILS FOR SPLASHBACK

CZ Pokyny před montáží

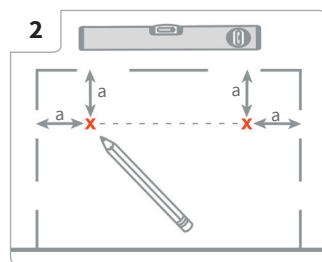

- U obložených stěn je vhodné vyvrtat otvory pro magnety ve spárách. Dbejte však na minimální vzdálenosti uvedené v montážním návodu.
- **V žádném případě nelepte lepicí destičky na kryt proti stříkající vodě před vyměřením magnetických držáků** (vzhledem k extrémnímu lepicímu účinku destiček není následná korekce možná!).
- Doporučujeme umístit kryt proti stříkající vodě na kuchyňskou pracovní desku tak, aby byl v jedné rovině se stěnou.

en Before the installation

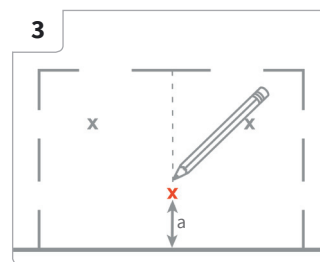

- In case of tiled walls, it is recommended to drill holes into the tile grout to install the magnetic holders. Pay attention to the minimum distances indicated.
- **Do not stick the adhesive plates without first measuring and carefully selecting the position** of the magnetic holders (due to the extreme adhesion of the plates, subsequent correction is not possible).
- It is recommended to install the splashback on the wall at the kitchen work-top.

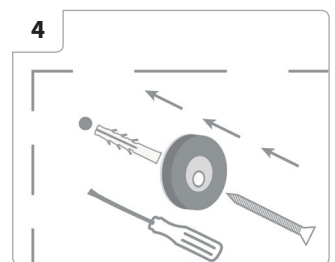

- 1** Zaměřte přesnou polohu krytu proti stříkající vodě a označte ji tužkou. Případně můžete obrázek přidržet na stěně a udělat značky.

- 2** Označte horní otvory pro magnety v oblasti vyznačené v kroku 1. Vzdálenost od okraje (a) k otvorům si můžete zvolit sami a měla by být alespoň 7 cm.

- 3** Uprostřed označené oblasti ve vzdálenosti od okraje (a) alespoň 7 cm vyznačte spodní otvor.

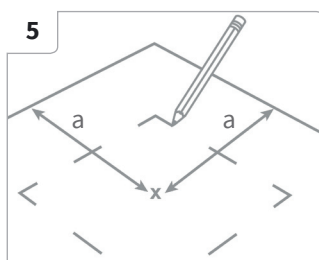

- 4** Vyvrtajte otvory a připevněte magnety. Poté položte skleněnou desku rubovou stranou nahoru na rovný povrch (např. stůl) a obrázek důkladně očistěte.

- en** Measure the perfect position for your splashback and mark it with a pencil. Alternatively, you can hang it up on the wall and mark the position.

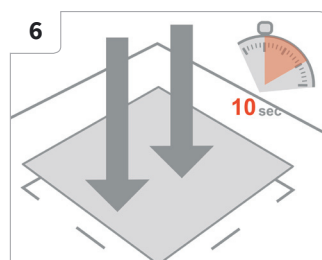

- Mark the upper holes for the magnetic holders within the marked area in step 1. You can select the lateral and upper distance (a) which should be at least 7cm.

- Mark the lower hole at the center of the marked area paying attention at the margin distance (a) which should be at least 7cm.

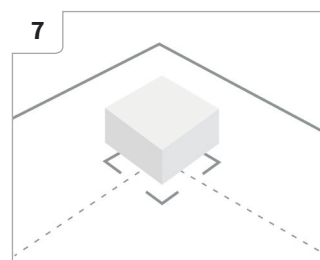

- Drill the holes and secure the magnets. Successively, place the splashback with the back upwards on a flat surface (e.g. table) and clean it thoroughly.

- 5** Pomocí pravouhelného trojúhelníku vyznačte tužkou na krytu proti stříkající vodě polohu lepicích destiček. Před nalepením důkladně zkontrolujte správnou polohu, protože lepicí destičky lepí extrémně silně a obtížně se odstraňují.

- 6** Přilepte destičku a na 10 sekund ji oběma rukama silně přitiskněte. Poté počkejte 30 minut, aby se plně rozvinul lepicí účinek.

- 7** Upevněte nástěnné nárazníky vlevo a vpravo dole v dostatečné vzdálenosti od okraje.

- 8** Zavěste obrázek tak, že jej opatrně přiložíte k magnetům zdola nahoru a s trochou boční síly jej správně nasunete na magnety.

- en** Now mark the positions of the adhesive plates with a right-angled triangle. Please double-check the correct positions before installing as the plates are ultra-adhesive thus difficult to remove.

- Stick the adhesive plates and press firmly with both hands for 10 seconds. Then wait 30 minutes to ensure complete adhesion.

- Stick the wall bumpers one on the lower left and the other one the right with enough distance from the edges.

- Hang up the splashback by gently tilting it from the bottom to the top of the magnets and sliding it onto the magnets with a slight lateral push.
